- **28.** Baseball A baseball player releases a baseball at a height of 7 feet with an initial velocity of 54 feet per second. How long will it take the ball to reach the ground?
- **29.** Rocket Launch A miniature rocket is launched off a roof 20 feet above the ground with an initial velocity of 22 feet per second. How much time will elapse before the rocket reaches the ground?
- **30.** Frog Jump A frog jumps from the ground into the air with an initial vertical velocity of 8 feet per second.
 - **a.** Write an equation that gives the frog's height (in feet) as a function of the time (in seconds) since it left the ground.
 - **b.** After how many seconds is the frog 12 inches above the ground?
 - **c.** Does the frog go any higher than 12 inches? Explain your reasoning using your answer from part (b).
 - **d.** Suppose the frog now jumps from 4 feet above the ground with the same initial vertical velocity. Write an equation that gives the frog's height (in feet) as a function of the time (in seconds) since it left the ground.
 - **e.** Should the frog reach the ground in the same time in both jumps? *Explain* why or why not.
