

3.5-3.6 (Extension): Similar Figures

Goals: *Determine if two figures are similar by setting up a proportion

*Find the missing side of a figure based on similarity

Congruent figures: two figures that are both the same _____ and the same

Similar Figures: two figures that are the same _____ but do not have to be the

same _____. (They could be though)

Corresponding parts: two _____ of two similar figures that have the same relative position. They are in the “same spot”

****SIDES OF SIMILAR FIGURES ARE _____****

*this means they form a _____

Decide if the given pairs of figures are similar or not.

Ex:

Ex:

Ex: $\triangle JKL \sim \triangle MNP$. Find JL .

Ex: $\triangle EFG \sim \triangle UVW$. Find UV .

Ex: $ABCD \sim GHIJ$. Find AD .

Ex: $JKLM \sim QRST$. Find KL .

Ex: Cape Hatteras Lighthouse in North Carolina casts a shadow 83.2 feet long. A man who is 5.8 feet tall casts a shadow of 2.5 feet. Draw a diagram and use your knowledge of similar figures to determine the height of the lighthouse.
